Term expires 1916

Florence A. McCarthy, 33 Lincoln Avenue  
Term expires 1916

#### SUPERINTENDENT OF SCHOOLS

David B. Locke, 50 Church Street

#### TRUANT OFFICERS

John W. Brislin, 104 South Street  
John J. Hickey, 143 Strongs Avenue

## WARD OFFICERS

### WARD ONE

Ward Clerk—Thomas J. Creed  
Inspectors of Election—1st, Frederick S. Chaffee; 2nd,  
Maxime Jasmin; 3rd, David W. Temple

### WARD TWO

Ward Clerk—William T. Simonds  
Inspectors of Election—1st, George H. Casavaw, 2nd,  
Charles W. McGuirk; 3rd, William H. Lawson

### WARD THREE

Ward Clerk—Edward C. Johnson  
Inspectors of Election—1st, Matthew Hussey; 2nd,  
Edward S. Whittaker; 3rd, Thomas Horan

### WARD FOUR

Ward Clerk—Riford R. Tuttle  
Inspectors of Election—1st, Asa R. Mairs; 2nd, Henry  
O. Carpenter; 3rd, Charles R. Tossing

### WARD FIVE

Ward Clerk—William P. Jones  
Inspectors of Election—1st, Rollin L. Richmond; 2nd,  
Charles S. Hoag; 3rd, Thomas P. Bragg

### WARD SIX

Ward Clerk—George N. Harman  
Inspectors of Election—1st, Raymond D. Beals; 2nd,  
Leon S. Robillard; 3rd, Charles W. Pennington

## WARD SEVEN

Ward Clerk—Peter F. McManus

Inspectors of Election—1st, Henry J. Hostler; 2nd,  
John F. Moloney; 3rd, Charles R. Brown

## WARD EIGHT

Ward Clerk—William M. Bruten

Inspectors of Election—1st, William H. Burke; 2nd,  
George H. Martin; 3rd, David M. Crafts

## WARD NINE

Ward Clerk—Alexander C. Mason

Inspectors of Election—1st, Alonzo B. Grant; 2nd, Jay  
W. Smith; 3rd, M. Scott Gooding

## WARD TEN

Ward Clerk—Louis W. Cole.

Inspectors of Election—1st, Arthur J. Courcelle; 2nd,  
Charles Mangan; 3rd, John D. Reynolds

## WARD ELEVEN

Ward Clerk—Walter J. German

Inspectors of Election—1st, John B. German; 2nd, Fred  
W. Hayward; 3rd, Caleb P. Buffum

†Appointed April 3, 1911, in place of Charles W. Ward, resigned. Elected March 7, 1911.

×Appointed October 21, 1912, in place of Charles H. Harrison, resigned.

## Report of the Mayor

To the Citizens and Tax-payers of the City of Rutland,  
Vt.:

I have the honor to submit the following report  
for the year ending December 31, 1913.

### FINANCIAL.

The Grand List of the City for 1913 was increased to \$106,714.10 as against \$95,508.72 for the year 1912. The tax rate was fixed at \$1.70, which made an increase of about \$19,000.00 in the amount available for general expenses.

Of this amount the schools by law received \$5,600 in additional appropriations; the State imposed an additional state-tax of 10 per cent on the Grand List of 1913, of which 5 per cent, \$5,335, was paid in 1913; the regular state and county taxes exceeded the taxes of the previous year by \$1,060; and there was brought over from 1912 an unpaid temporary loan warrant of \$7,000.00. The total of these increases exceeded the extra tax money received from the increased Grand List.

We are carrying forward to 1914 an unpaid temporary loan warrant of \$10,000.00 an increase of \$3,000.00 over last year. This is accounted for by the increased expense in maintaining bridges, amounting to about \$1,200.00; the payment of the Creed and

Burton judgment, which with the costs amounted to about \$1,500.00; and the large expense in the Health Officer's Department, the one item of police quarantine alone being nearly \$1,000.00.

At our annual meeting it was voted to issue \$15,000.00 in bonds for additions and repairs to the Lincoln Boulevard School Building. \$13,000.00 of these bonds have been sold at par to the Sinking Fund Commissioners of the City of Rutland, and the remaining \$2,000.00 will be sold as soon as the funds are needed.

Our net bonded debt on December 31st, 1912 was \$400,825.28 and on December 31st, 1913, it was \$394,513.58, showing a decrease of \$6,311.70.

The appropriation and net amount earned by the Sinking Fund increased the amount in the fund by \$19,311.70, this amount less the \$13,000.00 in bonds sold, show how the decrease was made.

The report of the City Treasurer shows in detail the financial transactions during the year.

### DEPARTMENT OF PUBLIC WORKS.

The old sewer coming from Church street through Edsonville under the stores on Center Street and Merchants Row, crossing Merchants Row and connecting with the West street sewer on West street about opposite Memorial hall is in a very bad state of repair on the West side of Merchants Row and must soon be thoroughly repaired or entirely replaced, as upon investigation conditions make necessary. In its present condition it is a menace to the public health and safety and a serious interference with the best use of property along its line.

Spellman Terrace, Summer street and that portion of Granger street between River street and Franklin street should be macadamized and provision made for the doing of such work the coming season.

The department has been to considerable pains to secure a thorough analysis of the material heretofore used in the construction of permanent highways and has also caused to be made an analysis of several different samples of stone from different ledges in this vicinity and has not as yet found a sample entirely satisfactory. It is possible that further investigation may demonstrate that economy in the expenditure of public funds for highways will compel the purchase outside the city of material for top dressing. If, upon thorough investigation, such a condition should develop, I would recommend that it be pursued.

#### DEPARTMENT OF CHARITIES AND CORRECTIONS.

The expenses for this department have been about the same as in previous years. I am satisfied that the financial management of that department has been good, and am satisfied from personal observation that the work of the present Overseer of the Poor, Mr. Brousseau, has been of the highest character. The Poor House I know from personal observation to be kept in a state of perfect cleanliness, and I am able also from personal observation to testify to the efficiency, consideration and kindness of both the Overseer of the Poor and Mrs. Brousseau.

Certain repairs, such as plastering and painting, etc., which will probably cost about \$250, ought to be made as soon as possible on the house.

#### DEPARTMENT OF PUBLIC SAFETY.

The work of the police and fire departments has been unusually satisfactory. Discipline and efficiency have been promoted and maintained in both the police and fire departments. Police headquarters have been enlarged and renovated. A detention room is to be established at police headquarters in order that it may not be necessary to place every person detained in the common lock-up.

It is now possible to communicate at any hour of the day or night with police headquarters by telephone as arrangements have been made to have an officer on duty there during the twenty-four hours.

#### THE CITY HOSPITAL.

The city hospital has received during the last year the usual appropriation from the city treasury, and I find that those who have been sent there at the expense of the city have at all times received the same consideration as those whose means permitted of their being admitted as private patients.

Our city hospital is today a fixed institution and the beneficial results obtained therefrom are of inestimable value to our city.

#### THE PUBLIC LIBRARY.

The amount appropriated by the city to the Rutland Free Library this past year was \$500.00 in excess of that of the previous year.

This is an institution that appeals to all—and under the present efficient management all patrons may feel assured that it will keep abreast of the times.

If the Memorial Hall, in which the library is now located, could be used exclusively for library purposes, the city would then feel obligated to keep it in proper condition. But as it is now, it is practically an unused building, except for the small space the library occupies.

In concluding my report, I wish to thank the heads of the various departments for their faithful co-operation at all times.

HENRY C. BRISLIN,  
Mayor.

## Report of the City Treasurer

To the Honorable City Council:

Gentlemen: I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1913.

## Report of Sinking Fund Commissioners

To the Honorable Council of the City of Rutland:

The following statement shows the condition of the Sinking Fund of the City of Rutland on this day and the transactions for the year 1913.

In accordance with the recommendations of the Auditors last year we are dividing the account between the Sinking Fund for General Purposes and that for the Water Department.

	Water	General	Total
Balance from last report	\$49,448 66	\$153,726 06	\$203,174 72
Received interest .....	2,027 22	6,302 24	8,329 46
Difference between par value of bonds and purchase price .....	44 11	137 14	181 25
City of Rutland payment to sinking fund.....	2,900 00	8,000 00	10,900 00
	<hr/>	<hr/>	<hr/>
	\$54,419 99	\$168,165 44	\$222,585 43
Paid accrued interest on bonds bought .....	\$6 67	\$20 74	\$27 41
Premium on bonds bought	17 43	54 17	71 60
Bal. invested as below..	54,395 89	168,090 53	222,486 42
	<hr/>	<hr/>	<hr/>
	\$54,419 99	\$168,165 44	\$222,585 43

## LIST OF SECURITIES

City of Rutland bonds and notes .....	\$111,000 00
City of New York bonds and notes.....	15,000 00
N. Y. C. & H. R. R. (L. S. Col.) bonds.....	26,000 00
Louisville & Nashville R. R. bonds .....	5,000 00

Rutland R. R. bonds .....	11,000 00

Cash in bank .....	1,486 42
	<hr/>
	\$222,486 42

Respectfully submitted,

JOHN N. WOODFIN,

NEWMAN K. CHAFFEE,

HENRY F. FIELD,

Commissioners of Sinking Fund.

Rutland, Vt., January 23, 1914.

Examined by us this day, found to be correct and approved by us accordingly.

C. TURNER,

GEO. C. COBB,

Auditors of the City of Rutland, Vt.

## Report of the Commissioners of Public Work

To the Honorable City Council:

Gentlemen:

### STREETS.

The increasing traffic necessitates more street work each year. We feel, however, that considering the limited funds we have at our disposal and the condition of the old crusher, not being able to install the new one, on account of the difference of opinions that existed among the board as to where the new crusher should be used and what stone should be used, have succeeded, in doing a considerable amount of work, using a stone called the "Brainard" for top stone or seal coat on asphalt work which we procured in Brainard, N. Y. However, in order to carry on the street work economically, we should have a stone quarry, but it has been impossible to find local stone equal to trap rock for road building.

I have sent samples from the various ledges in this vicinity to testing laboratories. The reports from these tests indicate that the North Main Street, also several other ledges near, are not good road building material except for use in a deep fill or as a foundation for a harder surfacing. The stone which appeared by the tests to be the best for road surfacing was taken from the ledge on North Church Street. Two laboratories stated that it was the best stone which had been sent to them by any one from Rutland. I would recom-

mend the purchasing of this property at a reasonable price.

I also recommend the macadamizing of Spellman Terrace and the paving of Grove Street beginning at the asphalt and running north to State Street, and as much more paving as can be done with the amount of money we have to spend for such work. I also recommend the completion of the unfinished portion of macadam of South Main Street, with the State Road money.

It must be remembered that our City has now over fifty miles of highways and that for that amount of mileage we only have a little over \$20,000.00. Ten per cent for the sidewalks and the balance for repairs and permanent work. A city in the state of New York that has only about 1,000 more population raises every twelve months a tax equal to \$40,000 for the Superintendent of Streets together with the right given him under the New York State law to assess abutters for one-half of all pavements of asphalt or a two coat of poured asphalt such as is being used on State Road work in the state of New York. The Superintendent of Streets also has access to one-half the liquor money paid in his city and this does not include state aid just how much amount I do not know, and this city to which I refer has no greater mileage than the city of Rutland.

I should recommend the placing of abutments under the Moon Brook bridge on Strongs avenue and making the top of reinforced concrete with cement side walls, also the bridge on South Main street over Moon Brook and the bridge on South Main street over Mussey Brook, and Grove street over Tenney Brook the same way.

New floors have been laid on the following bridges.

North Grove Street  
River Street  
State Street  
Strongs Avenue  
West Street

Also several of smaller span. That portion of River Street bridge spanning the railroad tracks has been painted, also two coats given the iron bridge spanning East Creek at Crescent street. That portion of the reinforced concrete arch bridge over North Main street at Tenney Brook, where broken, has been repaired and a wing wall built on the south side at the east end of the bridge.

#### AUTO TRUCK.

The auto truck has been in commission 138 5-9 days. Besides carrying stone from the quarry it has been used for considerable lighter trucking. Number of loads of stone delivered 268.

Cost of operation:

Labor, \$343.89; Material, 896.23; Total \$1,240.12.

#### CRUSHER.

During the early part of the season a No. 3 Climax Crusher of a catalogue capacity of 15 to 30 tons per hour was purchased but no site for it has yet been secured. The cost of same was approximately \$1,800.00 and \$900.00 for installation and foundations, a total of \$2,700.00 when in position.

The portable crusher at the Guerin ledge near Center Rutland was placed in operation during the

season. Owing to the fact that considerable stripping was necessary before quarrying was commenced and to the uncertainty of continuing operations along permanent lines in view of the fact that negotiations were in progress for a new quarry site, and a delay in the construction of one of our streets. The cost of operation was higher than ordinary, and consequently increased the price per square yard of our macadam.

The cost of operation as per material charged on requisitions: Labor, \$1,643.57; material, \$524.42, total, \$2,167.99.

Number of cubic yards output was 1,586 3-4.

Cost per cubic yard \$1.36.

As this included coal, oil and lumber used elsewhere or on hand the actual cost is as follows, per cubic yard \$1.24.

#### MACADAM.

Morse Place was macadamized from Madison Street to Washington Street using Pioneer Road Asphalt as a binder in the upper two inches, and constructing same by the penetration method. It was considered necessary to lower and change the location of the water pipe on this street for a distance of about 500 feet. A sub-drain about 400 feet long was constructed on the east side and two iron catch basins placed at the south end of street. Water service pipes were also placed for the vacant lots and all old services relaid. The Gas Company were also notified to do all necessary work before macadam was put on. The large amount of ditching on this narrow street and the construction of same before the dirt had time to consolidate required more stone than contemplated. This street had no foundation to start with and being a wet

soil it was considered necessary to give it a substantial thickness.

Gravel roads have also been built on East, Engrem, Jackson and Killington Avenue, and in co-operation with the State the Creek road, also on Lincoln Avenue a gravelly soil was used.

In the laying of the water pipe on Mussey Street an embankment for about 200 feet was constructed and a substantial reinforced culvert 2 ft. x 3 ft. put under same, also a railing on side of embankment.

The freshet in the spring necessitates considerable repair work principally on Clinton and High Streets, Kelley road at the south end and Water Street. We have also repaired with water bound macadam, portions of Strongs Avenue from Moon Brook bridge to Wales Street. Killington Avenue from East Street to Stratton road has been repaired with gravel.

Oiling streets was done by arrangement with the Standard Oil Co., using an automobile distributor.

Flushing the pavements on Center Street and Merchants Row was tried for a short time this season. The daily expense of same averaged \$8.92 with a probable additional cost for cleaning sewers. Before this is done on an extensive plan further investigation and cleaning of the sewer would probably be necessary.

The first week in May was designated clean up week and all rubbish was removed by the City during that period.

#### MORSE PLACE

STREET	Loads of Stone	Width	Length	Cost of Labor	Cost of Material	TOTAL
Street ...	157 truck 25 team	14 ft.	800 ft.	\$475 25	\$1,470 96	\$1,946 21
Sub-drain ..	9 truck			85 17	251 72	336 89

## ANNUAL REPORT

\*To replace old sewer.

A 6-in. sewer of about 300 ft. was constructed in Porter Street by Mr. Whitney.

Thirty-one connections have been made to the City sewers.

Two catch basins have been built, one on the southeast corner of Madison and Morse Place; one on the southwest corner of Madison and Morse Place.

Three manholes have been constructed. One at the junction of Temple and Porter Streets; one in the rear of the Shrine Temple; one on Furnace Street near Patch's.

## WATER SYSTEM.

A shortage of water in the Mendon stream August 18th necessitated a notice requesting people to refrain from using hose and using water only for the most necessary purposes. To relieve the situation a portion of the flow of the north branch of Cold River was turned into our supply.

The Gleason reservoir was thoroughly cleaned and several repairs made on main pipe lines where culverts pass under same and embankments were washed away.

### ENGINEERING DEPARTMENT.

The work of this Department during the year has been, as usual, largely on surveys and plats for lines and grades, on streets, walks, sewer and water pipe construction, etc. In the performance of that work about 25,000 feet of surveys have been made.

Scattered surveys, such as those necessarily are, take much more time than the same amount would in long sections. At the Brewer Place, so called, on the Killington Road surveys and plans have been practically completed and the main pipe line staked for turning a part of the water from the Cardell and Eddy brooks, so called, into the drainage area city water supply.

The total amount of repairs, new construction work, etc., done on the public works of the City will be found in the accompanied reports.

Respectfully submitted,

F. R. BLANCHARD,  
Commissioner of Public Works.

## Report of the Commissioner of Public Safety

To the Honorable City Council:

I respectfully submit the annual report of the Fire and Police Departments.

### FIRE DEPARTMENT

Our fire loss of the past year, a list of which is appended, amounts to \$25,193.01. This amount, though larger than the fire loss of 1913, is very favorable as that year's loss was exceptionally small.

The need of an automobile combination chemical and hose wagon is very apparent. Surrounding cities, some of which are much smaller than Rutland, are purchasing this kind of fire apparatus and they all are agreed that it is a great improvement over the horse-drawn wagon. The sale of the old fire engine and such other equipment as the motor wagon replaces would be advisable. Sometimes both teams answer alarms at the Center Rutland City line. This is a long run and if an alarm should ring from the central part of the city the motor wagon could make the run back much quicker. The difference in time might mean the saving in property loss of several times the cost of the motor wagon. I respectfully recommend the purchase of such a motor wagon this coming spring.

Some necessary repairs have been made on the fire alarm system. It is now working much better. One new alarm box has been placed on Meadow street. This was much needed. I recommend that the old pony boxes now in use be replaced by new ones and boxes be placed in several outlying districts where needed.

The hydrants have worked very satisfactorily this winter but there are several streets where hydrants are so far apart that long lines of hose must be used. This means delay in getting water on the fire, also the greater risk of hose bursting. I recommend that hydrants be placed at such points as soon as possible.

Much trouble has been experienced by false alarms. Ten of these have been responded to by the Department this year. Efforts of the Department and Police have failed to apprehend the offenders. When discovered they should be punished as the law provides.

I respectfully recommend that the ceiling and side walls at Station No. 1, first floor, be painted this coming spring. Also both hose wagons and the exercise wagon should be painted. This is a very necessary thing to have done as the wagons are much preserved by paint.

During the year the Department responded to 78 alarms made up as follows: 28 bell alarms, 40 still alarms, 10 false bell alarms.

#### Expenses of the Fire Department for the year 1913.

Payroll	\$9,081 69
Repairs	92 01
Feed	567 52
Telephone	12 00
Coal for fire stations and steamer	268 48
Horse shoeing	83 60
Work on fire alarm system and teams for same	264 22
Laundry	60 95
Commissioners' salaries	100 01
Ground rent fire station No. 2	18 00
Insurance	281 50

Supplies, including new hose	551 18
Electric lights and power for alarm system	360 81
	<hr/>
	\$11,741 97
Credit from July payroll and use of hose at Center Rutland	\$21 25
	<hr/>
	\$11,721 52

The inventory of the Department and property on hand shows a total value of \$25,906 56.

#### POLICE DEPARTMENT.

The personnel of the Department consists of—1 chief and 4 regular patrolmen, and 44 specials. One special police officer has done regular duty, due to the necessity of having a man in the station all of the time. For this reason, I recommend the appointment of one or more regular policeman.

This Department has rendered the City very efficient service during the year 1913. There has been no special disturbance or crimes committed.

I respectfully recommend that the Board of Aldermen enact an ordinance, as provided by the City Charter, licensing all public dance halls as places of amusement. This would enable the Police Department to control the kind of dances held in these dance halls and in cases where it was found necessary recommend the licenses be revoked.

Some very much needed repairs and changes have been made in this Department, the payment of which was provided for by the Board of Aldermen. The lockup has been thoroughly disinfected and repainted and an electric blower installed for ventilating pur-

poses. The Police Headquarters has been cleaned and painted. The adjoining room north has been converted into a detention room. Two detention cells have been provided to be used for women and boys. The room next north, in front of building, is now used as the private office of the Chief of Police. This affords an opportunity for anyone wishing to speak with the Chief privately to do so without great inconvenience as has been the case before this change was made.

The number of arrests during the year 1913 totals 430, of whom 414 were males and 16 females.

Offences for which arrests were made:

Intoxication .....	299
Breach of peace .....	53
Petty larceny .....	17
Receiving stolen property .....	1
Gambling .....	1
Selling liquor to minors .....	1
Assault with attempt to rob .....	1
Houses of ill fame .....	1

Considerable property has been recovered and returned to its owners and several arrests have been made for old offences in cases where warrants were held by the police.

The police signal and telephone system have worked very satisfactorily and, while it is some expense to keep in perfect working order, it is a great help to the Police Department.

The expenses of this Department for the year 1913 are as follows:

Payroll .....	\$4,817 97
Supplies, including new overcoats .....	209 66
Commissioners' salaries .....	100 00
Repairs .....	26 20
Telephone and signal service .....	195 01
Police for carnival and board .....	107 25

---

 \$5,456 09

The inventory of this Department is on file with the City Treasurer and totals \$568 45.

Respectfully submitted,

FRANK TRACY,

Commissioner of Public Safety.

## Report of the City Attorney

To the Honorable City Council:

I herewith submit my report for the year last past.

In the case of Creed & Burton against the City of Rutland, a suit brought to recover an account claimed under contract for construction work, judgment was rendered against the City and the case passed to the Supreme Court. The Supreme Court affirmed the judgment of the County Court and the judgment was paid by the City Treasurer.

The case of the Administrator of Ellen Rooney's estate against P. W. Clement, referred to in my report of last year, was enjoined by the Court of Chancery and the questions involved were heard before Walter P. Dutton, Special Master. No report has as yet been made. This was a case in which Mr. Clement, as Mayor, was acting for the City of Rutland and is being properly maintained at the expense of the City.

The City has brought suit against the Green Mountain Marble Company for the recovery of money claimed to be due for water supplied by the city to that Company and will come on for hearing at the coming March term of the Rutland County Court.

Suit was brought against Samuel Geno in behalf of the City for the same reason and it has been referred to F. C. Archibald to hear and report.

Several petitions have been brought to the Probate Court asking for the committment of insane persons as state charges to the Brattleboro Retreat. Several patients in the Brattleboro Retreat otherwise chargeable to the City, have been maintained at the

expense of their friends and relatives, and this support having been withdrawn on account of the inability of such friends and relatives to maintain and support these patients, petitions were brought before the Probate Court, requesting that they be committed as state charges. The petitions were granted in every case but I think that the public good would not be subserved by the publication either of names or cases.

Respectfully submitted,

P. M. MELDON,

City Attorney.

## Report of Overseer of Poor

To the Honorable City Council:

I respectfully submit the report of the Overseer of the Poor for year ending December, 31, 1913.

Respectfully submitted,

PETER H. BROUSSEAU,

Overseer of Poor.

## Report of the Board of Health

To the Honorable City Council:

The Board of Health of the City of Rutland herewith present their report for the year 1913.

We again call your attention to the importance of taking action to establish a system of municipal collection of garbage and its disposal. Such a system should be made to include the collection of refuse of yards and alleys—particularly in the rear of our business section. An efficient system of this sort would be a long step in promoting the sanitary condition of the city and would materially lessen the fly nuisance.

We also call your attention to the question of meat supply. It is known that a considerable amount of meat from diseased animals is offered for sale within the city. At present there is no way of preventing this, as meat when dressed for the market shows no evidence of its character. To exclude meat from an unhealthy animal requires the presence of an inspector at the time of slaughter, and we urgently recommend that your Honorable Board consider the appointment of a competent meat inspector.

We still recommend that something more permanent be done, in the way of securing better water for the city of Rutland, as the use of the bleach, as at present applied, should be regarded as only a temporary makeshift.

We beg to report that the work of the Health Officer has been performed in a very efficient and satisfactory manner and refer you to his detailed report.

Respectfully submitted,

CHARLES A. GALE, M.D., President,  
N. J. DELEHANTY, M.D.,  
FRANK D. WHITE.

## Report of Health Officer

To the President and Members of the Board of Health,  
Rutland, Vt.

Gentlemen:

I have the honor to present herewith the report of the transactions of the Health Department for the year ending December 31, 1913.

The large number of transmissible diseases was mainly due to an epidemic of Measles, of which there were 701 cases.

Scarlet Fever has been prevalent throughout the year, the early cases being of a very severe type and confined principally to the Italian residents. There were eight deaths and that the spread of this disease was not greater, is largely due to valuable assistance from the Police Department in maintaining an efficient quarantine.

A very mild form of Scarlet Fever prevailed throughout the latter part of the year and the failure of properly reporting these cases made the situation difficult to control.

Five patients were admitted to the Isolation Hospital and of this number there were two hotel employees suffering from Diphtheria; I firmly believe that the early isolation of these two patients, averted an epidemic of Diphtheria at a time when a large convention was being held in the city.

In this connection I would respectfully suggest that some measures be taken to settle the difficulty of caring for patients who are obliged to be sent to the Isolation Hospital on account of having a contagious disease. There has been considerable misunderstanding

ing as to who shall pay the bills for nursing, medical care, etc. Those people are isolated for the benefit and protection of the rest of the community and some satisfactory arrangement should be made to pay their bills.

For the grades 9 to 12 o'clock a. m. and 1:30 to 3:30 o'clock p. m.

For High School 8:45 to 12 o'clock a. m. and 1:30 to 3:45 o'clock p. m.

Holidays: Columbus Day, Thanksgiving Day, Washington's Birthday and Memorial Day.

No-school signal: six blasts on the fire whistle (— — — — —) given at 8 or 11:30, closes first four

grades for the half day following. The same signal repeated—no session in any school for the half day following.

Regular meetings of the Board of Education, first Monday evening of each month at 7:30 o'clock. Superintendent's Office, High School Building.

Office hours of Superintendent of Schools, 8:30 a. m. to 10 a. m. on school days; Saturdays during the term time from 9:00 a. m. to 12:00 m. Office, High School Building.

## Board of School Commissioners CITY OF RUTLAND

**Organized July 1, 1913**

President, HARVEY R. KINGSLEY, 73 Pine St.

Clerk, David B. Locke, 50 Church St.

### SCHOOL COMMISSIONERS

Name	Residence	Term Expires
George H. Baker,	73 Park St.	1914
Thomas A. Cootey,	40 Washington St.	1915
Laura B. Cramton,	111 Park Ave.	1916
Nicholas J. Delehanty,	48 No. Main St.	1914
Edward C. Johnson,	17 Madison St.	1915
Harvey R. Kingsley,	73 Pine St.	1916
Charles H. Landon,	43 Grove St.	1914
George F. Leonard,	248 West St.	1916
Florence A. McCarthy,	33 Lincoln Ave.	1916
Henry S. Parker,	66 So. Main St.	1915
Marvelle C. Webber,	26 So. Main St.	1915

### STANDING COMMITTEES

On school Instruction, Text-Books and Teachers—McCarthy, Johnson, Parker, Cramton and Cootey.

On Supplies—Delehanty, Webber, Landon and Parker.

On Finance—Landon, Webber and Leonard.

On School Houses, School Property and Fuel.—Webber, Parker, Baker and Johnson.

On Tuition—Baker, Leonard and Delehanty.

On Rules, Regulations and Discipline—McCarthy, Cramton and Cootey.

## Report of the President

OF THE

## Board of School Commissioners

To His Honor the Mayor and the Citizens of Rutland:

Six years ago, as President of the Board of School Commissioners, I reported to you the condition of our schools; and now that I am once more serving you in the same capacity I take pleasure in reporting to you again, and again I am able to "report progress." Our financial statement and the reports of the various school officials treat their subjects in detail. Therefore, my report will be a general one, emphasizing what the Board has done in the past year and what they hope to do in the future.

Our public school system is by far the largest department of our City government. Its property is valued at \$260,000 upon which the insurance amounts to \$97,000. Seventy-six persons are employed as Superintendent, teachers, janitors, etc., and the educational needs of about 2300 children are ministered to. This is a large plant and one that the tax payers should not allow to deteriorate.

### FINANCES.

To maintain this plant the School Board during the past year received \$53,353.05 from the City of Rutland and from the State \$3,777.69. The balance of the \$60,639.31 at their disposal was derived from tuition, rents and receipts of an incidental nature.

The largest item of expense was \$45,369.88 for salaries and \$6,654.51 was paid out for fuel and lights. The expense for repairs and supplies has been kept down to as low a figure as possible compatible with the successful operation and up keep of the schools and the safety and comfort of the scholars. Within the next two or three years much will have to be done to the Pine Street and Longfellow Buildings and it is, therefore, a fortunate thing that by the exercise of strict economy the School Board closes the present year free and clear from all indebtedness and carries a surplus of \$508.94 over to 1914.

#### CONDITION OF SCHOOL PROPERTY.

Generally speaking the School property is in good condition and the quality of the janitor service is, as a rule, satisfactory. The condition of the heating plants in the Pine Street and Longfellow Buildings and lack of ventilation in the High School are, however, matters that will very shortly need attention. The recent fire at the Park Street Building was an unfortunate occurrence and was the first severe fire that the schools of Rutland have experienced in a number of years. Fortunately the loss will be amply covered by insurance and the Building Committee plans to repair the building sufficiently for its immediate use and postpone all repairs of a permanent nature until the summer vacation. The teachers are to be congratulated upon the manner in which they handled the children entrusted to their keeping and the thanks of the School Board are extended to the members of the Rutland Fire Department for the efficient manner in which they did their work under very trying climatic conditions.

At the tax payers meeting in March 1913 the citizens of Rutland generously voted a bond issue of \$15,000 for the enlargement of the Lincoln Building. The City Council did not approve this bond issue to raise funds for these improvements until late in the spring, and the bids for the work were not opened until the July meeting of the School Board. The amount called for by the lowest bid was so close to the sum which the Board expected to receive from the bond issue that a conference was authorized between the Building Committee, the architect, and the successful bidder with a view of reducing the bid price. Satisfactory arrangements were finally made but the work was delayed until early in August. Since then it has proceeded in a rapid and satisfactory manner, and in spite of the inconvenience caused by the repairs the teachers at the Lincoln Building have handled the situation in a most efficient manner.

During the past year the exterior of the School Street Building has been painted one coat with the expectation of putting on the second coat during the coming summer. The interior of this building has been redecorated and the desks scraped and varnished. Necessary painting has been done at the Dana School. Repairs have been made to the plumbing at the High School and several new radiators have been installed. Also considerable redecorating has been done in the interior of this building. The annual patching of furnaces has taken place at the Longfellow Building and the ventilating system at Pine Street has been greatly improved.

During the past summer the fire insurance upon the school property was re-written and the amount was slightly increased. In view of the fact that our finances demanded the most rigid economy in adminis-

tration, it seems to me that the Board has acted very wisely in the matter of repairs and improvements.

#### MEDICAL INSPECTION.

I regret that the School Board could not see their way clear to adopt some form of Medical Inspection this year. In the first place the taxpayers asked for it and their request should have been heeded. In the second place I feel sure that Medical Inspection will surely be adopted in the near future and the sooner the School Board can adjust its finances to this added drain and the sooner we can ascertain the most economical and efficient system of Medical Inspection, the better. When the School Board see fit to adopt this Inspection, I hope that it will make the assurance of its success doubly sure by uniting with the City Council,—if that body is favorable,—in an appropriation for the equipment and maintenance of a free public dispensary at our local hospital where the satisfactory treatment of cases of sickness, especially among our poorer children, may be assured. In view of the large number of cases of scarlet fever, chicken pox, and other contagious diseases among the school children, I ordered the fumigation of every school building during the Christmas recess and the children were medically inspected upon their return to school after the holidays. In view of the condition, I do not think that I exceeded my authority in ordering this work done. The work was performed under the supervision of our City Health Officer and the results were, so far as I have been able to ascertain, universally satisfactory. I think that if the reports of the examining physicians were published, they would furnish unanswerable arguments in favor of School Medical Inspection.

#### THE GRADED SCHOOLS.

Since the opening of school everything has gone smoothly in the Grades. It is true that there have been the usual cases of crowded rooms but, when two extra rooms are opened at the Lincoln Building, this annual annoyance ought to be obviated for many years at least. The Parent-Teachers' Associations of the various buildings are doing most efficient work and deserve the thanks and co-operation of the Board. The fact that 439 persons have visited the different schools since the beginning of the school year must be encouraging to teacher and pupil alike. My only regret is that no more than 13 saw fit to visit our High School.

#### THE HIGH SCHOOL.

The High School opened this fall with several new members in its faculty. These new teachers are doing their share toward maintaining the high standard of the school in a satisfactory manner. The High School also opened with an increased enrollment and now the library has to be used for recitation purposes and a portion of the Assembly Hall is given over to the classes in drawing. While students from other towns are always a welcome addition to the High School, I doubt the wisdom, in view of the rather crowded condition, of keeping their tuition down to \$36.00 a year when the per capita cost of educating a child in the Rutland High School is \$44.64. In other words, these tuition scholars are being educated for about \$8.00 less than the actual cost.

I regret to see so many "omit periods" in the High School day. I would rather see these periods consolidated into a conference period where a scholar

could receive help from the teacher in the particular subject in which he is in difficulty.

At last the School Board is in a position financially where they can materially strengthen the Commercial and other Vocational Departments of the High School, and to this end the School Board has made improvements in the Commercial Department and has appropriated \$700 for new apparatus in the Manual Training Department. I doubt if there is a wood-working establishment in Rutland today with better equipment of its kind than can be found in our Manual Training rooms. The Board earnestly invites the cooperation of the business interests of Rutland in making these vocational training courses a success. And I trust that the High School Faculty will help to dignify these courses by giving the scholars the feeling that in vocational work they are fitting themselves for as useful service in the community as is the child who is studying Physics, German or Greek. On the other hand, I do not think that, by making these improvements, the School Board wishes to be understood as unduly emphasizing vocational courses to the exclusion of everything else that the High School has to offer. As I understand it the Board's object is to supply the child whose mental bent is for vocational work with suitable equipment to make the work most effective.

One clause in the recent report on High Schools in Vermont so exactly reflects my own views upon the subject that I am going to take the liberty to quote it. "It is clear that the secondary school should be organized so as to deal with every normal child; that it should provide widely varied opportunities for determining the central tendency of a child's abilities

and disposition; that its courses should include, not incidentally but treated with intensive thoroughness, those fields in which the youth of the community are likely to find their permanent careers."

### CONCLUSION.

It is my sad duty to report the deaths of Mr. Warren R. Rice, Supervisor of Wood Working, Mr. Hubbard and Mr. Reed, janitors of the Madison and Park Street Schools. These men were faithful in the performance of their duties and their places will be hard to fill.

Since writing my last report, two former members of the Board of School Commissioners have been called to their eternal rest. It was my privilege to serve for six years upon the Board with Mr. Ward and Mr. Lamb. I knew them well and I know how deep was their interest in everything pertaining to the schools. All honor to their memories as faithful and efficient public servants.

In conclusion, I wish to express my thanks to our Superintendent and teachers for their loyal work in promoting the best interests of the schools of Rutland. I am sincerely grateful to my colleagues on the Board for the honor they have done me in electing me their presiding officer but I am even more grateful for the spirit of harmony which has prevailed during the past year and which has almost invariably manifested itself in our deliberations.

Respectfully submitted,

HARVEY R. KINGSLEY,

Pres. of Board of School Commissioners.

February, 1914.

Totals, 1909-10.....	64	2259	1952.7	1827.6	93.5

General Average of the State, 1911-12..... 92.

## FINANCIAL STATEMENT.

For the Natural School Year Ending June 30, 1913.

Total expenditures for all the schools.....	\$56,234 74
Total expenditures on High School (less book re- bate).....	17,812 49
Total expenditures on Grade Schools.....	38,422 25
Average cost per pupil based on membership.....	28 07
Average cost per High School pupil based on mem- bership.....	44 64
Average cost per grade pupil based on membership.....	23 95
Expense for free text books and supplies less re- bates.....	3,097 00
Expense per pupil based on average membership..	1 55

The above statistics are based upon the latest re-  
turns to the City Clerk and to the State Superintendent  
of Education. Compared with those of last year they

show that during the natural school year ending June 30, 1913 the enrollment, membership and attendance each made substantial gains and that for the first half of the current school year the enrollment, membership and attendance each increased more than thirty over corresponding data of the preceding year. The percentage of attendance to the membership continues to show a general average above 94%, which is above the average both in this State and throughout New England.

#### FINANCES.

The normal resources for the schools during the fiscal year ending December 31st, 1913 were \$60,639.31 and the expenditures were \$60,130.37, leaving an unexpended balance of \$508.94. This is the first year in the history of the city that the receipts and expenditures for the schools have each exceeded sixty thousand dollars. This increase in the school revenues has enabled the School Board to meet all outstanding bills, to purchase to a large extent the fuel and supplies for the entire current year at a great saving to the city and to carry over a substantial surplus to next year.

The proceeds of the \$15,000 bond issue have provided a four room addition to the Lincoln school building and will leave about \$1,000 for improvements on the furnaces in the Longfellow and Kingsley school buildings.

The large revenue for the schools in 1913 was due almost entirely to an increase of more than a million dollars in the taxable property of the city resulting from the last quadrennial appraisal and from the law abolishing offsets. The rebates from the State have continually decreased of late being at present only

about one-half the amount received from the State four years ago, and the amount at present received is likely to be still further reduced by recent State enactments. It is also probable that the taxable personal property of the city may be decreased rather than increased in 1914. It must, therefore, be borne in mind that the normal revenues for the schools, notwithstanding their continual growth, are not likely to be further increased before the next quadrennial appraisal of city property, since the yearly increase in the grand list due to building operations is likely to be offset by diminished personal lists and by smaller rebates from the State. Hence larger school expenses would mean a deficit in the School Department or a higher rate of taxation for school purposes, neither of which under our City Charter would be legal without a special vote of the citizens authorizing the same.

#### THE SCHOOL PLANT.

The school plant of Rutland consists of nine school buildings erected and owned by the city and a one-room school house rented by the Educational Department. Upon the construction, enlargement, and equipment of this plant more than a quarter of a million of dollars has already been expended and to maintain this property and its equipment in a first class condition adequate to the present day demands of society and of the State at least two per cent of the original investment should be annually expended upon its upkeep. In other words, the School Board should on an average annually expend \$5,000 of its school funds to keep this valuable property from deteriorating. This does not include the cost of carrying about \$100,000 insurance on the property as protection against losses.

Speaking in general terms, the school plant in this city is in good condition and compares very favorably with that in other cities and towns in New England of wealth and population equal to those of Rutland; but the plant demands constant attention; buildings must be painted and repaired, rooms re-decorated, heating plants renewed, ventilation systems improved, and many appliances for the greater safety, comfort and advancement of pupils must be provided. To meet these constantly recurring and increasing demands the School Board should expend annually, at least for several years, five thousand dollars, and this expense should, in my opinion, come out of the ordinary revenues for running the schools.

#### A WIDER USE OF THE SCHOOL PLANT FOR THE BENEFIT OF THE PEOPLE OF RUTLAND.

Inasmuch as your City Charter requires the Superintendent of Schools to make his report jointly to the City Council and to the Board of School Commissioners, I trust I may be pardoned if in discussing this topic I digress somewhat from the ordinary form of school reports.

The public school is the child of the State created and nourished for the development and improvement of its citizenship. This institution is absolutely necessary under a republican form of government for without an intelligent, honest citizenship no republic can long exist. In view of this fact, our State is distributing annually for the support of schools more than half a million dollars and she is encouraging and directing the towns and cities to raise and expend locally each year at least three times the amount of the State's contribution. It should be remembered also that all

these expenditures are met ultimately by the taxpayers of the towns and cities. In fact, during the past year this city has been required by law to contribute to the State directly and indirectly for educational purposes at least \$5,000 more than she has so received from the State.

It is evident, therefore, that the citizens and taxpayers of this city of a right own and maintain its school plant and should direct and control the plant and the schools for the greatest benefit of all her people.

The City Council and the School Board, therefore, should work together in harmony in securing the greatest possible benefits that can be derived from the annual expenditure of a large sum of money in conducting its system of schools.

If this spirit of harmony can prevail I see no reason why some or all of the improvements I am about to suggest may not be brought about.

The High School Building has become overcrowded, and in order to carry on the work which the school is now attempting, additional accommodations are needed and cannot long be unheeded. The Manual Training Department with an enrollment of two hundred boys is housed in the basement; the Domestic Science Department with an enrollment of eighty girls, in the attic; the Art Department with an enrollment of ninety pupils, in the Assembly Hall; the Teacher Training Course with an enrollment of fifteen pupils, in the Dana building; the Principal's office, also used as a recitation room, is located in the Library; the School Board's and Superintendent's office occupies a former vestibule ten by twenty-three feet; the book and clerk's room with its book shelves, desk, type-

writer and adding machine is crowded into a room eight by sixteen feet, and no separate rest room and toilet are provided for seventeen women teachers working in the school.

Moreover, there is no available space in the building for enlarging the work that should be done by the school; additional space should be provided for the Commercial Department, and classes in sewing, millinery, and household economics, also for classes in agriculture, and in wood and iron working. This needed space might be secured in either of two ways; by an addition of suitable dimensions to the High School Building, or by transferring the offices of the School Board, Superintendent and Clerk to the City Hall where the other city officers are housed, assigning the rooms thus vacated to the use of the Principal and turning over to the School Department Fire Station No. 2 for Manual Training and Agricultural courses. The propriety of the transfer of this Fire Station to the uses of the school is more apparent when we consider its location upon school ground, its proximity to a school of over four hundred pupils, and the resulting distraction from work and danger to lives of pupils in case of fire alarms at hours of dismissal.

In return for these concessions by the City Council, the school plant should be available for the fullest development of the social and civic life of the city; the school house should become the "social center" of the neighborhood; Playground Associations should be encouraged; Vacation Schools for the needy should be opened; Evening and Continuation Schools for adults should be maintained; and I see no impropriety in granting the use of one room in each school building for city polling purposes, especially as the number of

women-voters now exceeds one thousand and at present many of the polling places are unsuitable and not in keeping with the dignity and good name of the city.

I quote briefly from my report of 1910: "Within the last decade sentiment in regard to the uses of the school plant has radically changed. Instead of such school property being used a scant seven hours daily for one hundred eighty days during the year, less than one-half of the usable period, it is becoming more and more the policy to put such property to the greatest possible use for the benefit of the citizens of the city.

At the same time the school plant already belongs to the people and it is proper to employ it for their social activities.

We can no longer restrict the word education to the few fundamental operations so often characterized as the three R's. The newer idea does not limit its application to the schooling of children but extends to the intellectual progress of all who would follow the paths of learning.

'Every school house, as far as possible, should become a center of community life.'—Superintendent Gordy of Springfield, Mass.

'As President Eliot has pointed out, there can be no waste of money in public school administration comparable to the waste involved in permitting millions of dollars worth of property to remain unutilized except during the hours when school is kept.'—Superintendent Maxwell of New York City.

'The National Education Association heartily endorses the use of school buildings and all school equipment for community interests and social betterment.'—Declaration of 1909."

This impartial and exhaustive report by expert investigators of national reputation should be carefully studied by every citizen since it cannot fail to influence State legislation and to some extent revolutionize the methods of instruction and subject matter taught in the schools of this and other states.

It is not my intention to analyze and discuss the report in detail but to call attention to certain defects which the report finds in our present Educational System and the remedies suggested.

"There must be adopted in the elementary school, and later in the high school, a course of study related to the life of the child; it is clear that the domination of the college and of preparation for college has had an undue effect upon the courses of study and the methods of instruction even in the elementary schools, ninety-five per cent of whose children are never to enter college."

"As a minimum the school should do at least three things for the child—teach him self-discipline, teach him to think, and strengthen his relations to the social and industrial interests of his community."

"The purpose of the public elementary school cannot be other than assistance in developing character and making good citizens. On this ground alone can the expenditure of public money for schools be justified."

"The course of study at present arranged for the grades aims to prepare for the high school. In a few particulars only does it attempt to meet the child's present needs."

"So far as English in the elementary schools is concerned, little attention is given to adapting the subject to the child's needs or interests. The course is based on a supposition that the child will enter the

high school, and that the work given is that which is best calculated to prepare for that end. The fact that only a few of these boys and girls will enter high school is constantly ignored."

"For the sound development of secondary education in the future the curriculum must be freed from college control. The college should indeed dominate the secondary school, but its domination should be exerted through the teachers. What the secondary school needs is not primarily a curriculum—least of all a college-made and college-guarded curriculum—but good teaching. The present subordination of the teacher to the curriculum must be reversed and the curriculum be subordinated to the teacher, if there is to be real progress."

"The existing emphasis upon the curriculum with its 'points' and 'credits' and pages to be 'covered,' its arbitrary standards and its logical balance of studies has gone far to obscure the real meaning of education as a process of choosing and applying those things that will secure the strongest and most profitable reaction in a child."

"Less than ten per cent of the pupils in Vermont high schools go to college, but the studies that the colleges require of them crowd out from the curriculum all forms of instruction, aside from commercial branches, that might make the other nine-tenths of the students happier and more efficient in their future occupations, whether they be farming or business, teaching or home-making."

"It is clear that the secondary school should be organized so as to deal with every normal child; that its courses should include and treat with intensive thoroughness, those fields in which the youth of the

community are likely to find their permanent careers; and in the arrangement of curriculum and program, in the ordering of general school activities, in the training and spirit of the teaching staff, the central purposes should be to establish the child in the noblest mental and spiritual relations with life."

"An avowed shift of emphasis in education should be made from the curriculum to the child, involving the intimate and continuous study of each individual child to determine what his characteristics and needs are."

"Even the continuity of a course involving extravagant expenses—for one or two pupils—might well be sacrificed if the teacher's time or salary could be invested elsewhere to greater advantage."

"The school problem in Vermont, as in all other states, lies in the question how best to utilize the time of children from six to eighteen years old, so that these shall contribute in the most direct way both to citizenship and to economic efficiency."

"A wise program in the formation of vocational schools would seem to be the reform of the public school system so that the youth of Vermont may be educated toward the occupations of the communities in which they live."

The suggestions and recommendations quoted from this report are directed against the public school system of the State rather than against any particular school or locality. It is doubtful, however, if the schools in any town or city in the State can plead "not guilty" to the indictment.

The public schools of Rutland are no exception to this general rule. The colleges dictate to the High School; the High School dictates to the grades, and

under this scheme of fitting for college the pupil too often is turned away from the studies that would best fit him for his home and community duties or else he drops out of school altogether since the school offers little or no training for his life's work.

In speaking thus I do not wish to be understood as underestimating the value of preparing for college in our High School. I simply wish to emphasize the fact that the great majority of the pupils in this city never expect to go to college.

Again, little or no special attention is given to the training of pupils who must of necessity fail to complete a course. In general one-half of the pupils of the fourth grade in our city never complete the ninth grade work; one out of every four pupils entering the ninth grade never enters the High School; one out of every five in the "D" Class in the High School never enters the "C" Class (more than ten per cent of the "D" Class have already dropped out); less than half of the pupils who enter the High School ever graduate, and statistics show that throughout the State only about five per cent of the public school pupils ever enter college.

At present this city is expending approximately \$60,000 annually in running the schools. Of this amount, \$20,000 is being spent upon the High School with an average membership of about four hundred pupils; the remaining \$40,000 is expended upon the elementary schools with an average membership of about sixteen hundred pupils.

In some of the more favored communities of New England the average membership in the grades is limited to twenty-five pupils to a room, but in Rutland, with the exception of the Gilrain Avenue and the four

small rooms in the School Street Building, each graded school in October had an average membership of forty-two pupils, while at the same time in the High School each week there were twenty-seven recitations with five or less pupils in the class and one hundred fifty periods entirely vacant with no recitation. Here is an unjust distribution of money and teaching force, and calls either for a larger amount of school funds and teaching force devoted to the grades or a re-adjustment of the present funds and teaching force. It should be our aim to reduce the average membership in our grades to at least thirty-five pupils to a room, which with our present membership, would require the opening of six or seven additional rooms.

The Carnegie Report emphasizes the need of utilitarian and vocational training and suggests that this work be commenced in the grammar grades. If the conclusion deduced in the report is correct that public funds for public schools can be defended only on the ground of improving citizenship and securing greater efficiency for life's work, then, it is at least implied that school funds can with propriety be expended upon those enterprises which make for the general intelligence and efficiency of a people whether under or above compulsory school age.

On this ground I believe the School Board of this city should encourage Vacation, Evening, and Continuation Schools open to all persons who really desire to continue their education and become more efficient and intelligent citizens.

#### MEDICAL INSPECTION

By recent State enactment School Boards are authorized to appoint medical inspectors for the schools

provided the voters at their annual meeting so instruct the Commissioners.

At the last annual meeting of the city Medical Inspection was authorized. The School Commissioners after due deliberation appointed a sub-committee to investigate this subject as related to the schools in this city and to report to the full Board. Inasmuch as the vote in favor of Medical Inspection was small the School Board directed its sub-committee to insert an article in the *Warning* for the coming annual meeting for the voters to again pass upon this subject; and it is probable that, if the voters still favor it, the School Board will be prepared to carry out their wishes in a thoroughly effective and business-like manner.

Medical Inspection in the schools is based upon the idea that the well developed child should possess a sound body as well as a sound mind; the physical side of the child's nature is receiving more and more attention from educators, and, since school attendance is compulsory, the school officials are bound to protect the child's health while in school and as far as possible remove physical defects, too often overlooked by careless or indigent parents, and which prove so often a serious handicap to the child.

The Vermont State Board of Health favors Medical Inspection and suggests three details of the work. "First—The early detection and exclusion of contagious diseases; second—Routine examination and records of the physical condition of all school children, and third—Responsibility for the sanitation of the school plant."

I am convinced that this subject will commend itself to all thoughtful parents who have children in the schools and I believe a plan of inspection can be adopt-

ed that will prove a great protection to pupil's health, and, at the same time, prevent serious interruption of school work due to epidemics and communicable diseases.

#### SPECIAL REPORTS.

Annexed to this report will be found those of the Principal of the High School, Supervisor of Music, Supervisor of Drawing, Supervisor of Manual Training, Supervisor of Domestic Science, and Truant Officer. We ask your careful attention to these reports which give a general idea of the scope of work done in these various departments.

#### CONCLUSION.

In closing this report I again wish to make hearty acknowledgment of the unfailing courtesy, good will and assistance, so generously extended to me during the past year by all with whom I have been associated

Respectfully submitted.

DAVID B. LOCKE

Superintendent of Schools.

February 14th, 1914

## Report of the Principal of the High School

Rutland High School, February, 1914.

To the Superintendent of Schools, D. B. Locke:

I have, herewith, the pleasure of submitting to you my fifth annual report of the High School.

While statistics can give only facts and never, by any possibility, reasons for facts, and while reasons for facts are much more interesting than the facts themselves, sometime facts, revealed by statistics, are in themselves interesting. It is in the hope that this may prove to be true in the following statistics that I offer a few: the enrollment of the school thus far this school year is 483, an increase of 163 since the Board provided additional room in 1908. Of that number 29 have, up to this date, withdrawn from school, and it is interesting to note the reasons for their leaving school. Four have gone elsewhere to school, 3 have moved out of the state, 2 have married, 10 have obtained positions in business of one kind or other, and the remainder, all girls, are staying at home, making themselves useful there in various ways. Considering that, every year, many enter high school merely as a makeshift, until something "turns up," the loss of 29, the first half year, out of 438 is neither great nor surprising. It is further interesting to see from what classes the losses have come. From the post-graduate 3, Teachers' Course 2, A Class 1, B Class 4, C Class 6, D Class 14.

Closely related to this group of statistics is another, smaller but even more interesting. In the fall of 1913, 38 of the graduates of Rutland High School entered college or some other school for advance work, and up to the present time this year 42 have expressed their desire to take advantage, next year, of the same opportunity. It is this awakening of a desire in boys and girls to seize opportunities to fit themselves for their best in every way that gives to any school its highest claim to fine service to the community in which it stands; and, in view of the fact that it is better for the boy to incite him to higher effort than to persuade him to take lines of least resistance, no matter what his path in life may be, and of the further fact that it is a finer service to the community to keep open for *all* the door to larger opportunity than to close it against even one by inducement to a premature choice of vocation, it seems to me that the phrase "fitting for life," is already showing itself to be both specious and misleading. In other words the boy who can be awakened to see and incited to lay hold of larger opportunities for himself is pretty surely "fitting himself for life."

At this writing I am not able to give a report of the work of our boys and girls in college this year, as the first semester examinations are but just over, but for the past four years reports have been uniformly up to the expectations of the school. There has been growing, all this time, a very wholesome influence of the boys and girls in college upon those coming up in the school, which is showing itself in more serious work and in a greater desire among an increasing number, to fit themselves as well as possible for future service. A fine instance of this influence and interest

was shown in the fall in the unselfish and unstinted service of one of our graduates on the football field. It has been a very great pleasure to watch the growth of this spirit that gives and asks no return and that urges others to their best.

To the good work in the school this year some other things have greatly helped, and for these sincere thanks are due to the School Commissioners, an acknowledgment I am glad to make. The additional teacher has relieved the overwork of the past two years and given to the teaching force just that margin which makes it feel it has time to prevent the many little, unobtrusive, but important things from being undone. The continuance of the solid session on Fridays has completely justified itself in every way, e. g.: The tardiness for the fall term of fifteen weeks, 120 actual sessions, with an average daily attendance of considerably over 400, amounted to 214, or about one tardiness for every two pupils for the fall term. Or to put it in a more striking way, out of a possible 48,000 tardinesses there were only 214. This is the first year in which all the entering class have begun the Algebra in the High School, and, as far as can be judged in one-half year, the change is fulfilling all that was expected of it. Especially grateful are the ampler spare and larger equipment given to the teacher of drawing, and the larger amount of the time of the teacher of Domestic Science at the disposal of the high school. The great increase of pupils in both these departments is warrant for the wisdom of the Board in granting what was asked for them. Last, but not least, is a separate room for the principal's office; the value of this addition is not easily put into words.

I cannot conclude without an additional word of

thanks to the Board of Commissioners for their continued confidence in the management of the high school and an assurance in the name of all the teachers, that our best efforts will continue to be put forth not only to maintain but to enhance the excellence of the High School.

Respectfully submitted,

ISAAC THOMAS,

Principal.

## Report of the Supervisor of Music

To David B. Locke, Superintendent of Schools:

I here present my report as supervisor of music for the year ending with December, 1913. During part of the past year some schools have been laboring under adverse conditions which have prevented the best results in the study of music, but the outlook is now brighter and I feel confident of more rapid gain on the part of the pupils in this really important, although sometimes underated, study. There is a slow but sure increase of interest manifested which betokens good fruit to come. A system of sight reading from individual slips is about to be re-installed in the lower grades after several years of disuse. A frequent resort to the use of these slips keeps the teacher constantly informed as to the ability and progress of each pupil, and this knowledge properly acted upon by the teacher should measurably increase the musical attainment of the pupils. A feature of music study which is very interesting and instructive to the pupils, is the recognition of phrases of songs which are placed upon the board, frequently in different keys from the book version. The ability of attentive pupils to name the phrase from mentally hearing it, is very gratifying, and this phase of the study is being developed as much as time will permit in all but the lowest grades. The result of more systematic work with young, changed voices in the grammar grades is becoming manifest in the freshman class of the high school, each year show-

ing a greater number of tenors and basses conversant with their new clef and part progressions, and courageously doing their share of the assembly singing. The study of music in the upper classes of the high school, wheré it is elective, has not been undertaken during this first term.

The plan of encouraging the young ninth grade players of orchestral instruments to begin rehearsing together in preparation for such work in the high school orchestra will doubtless result in a larger and better band of players than to delay such work until their freshman year. Rehearsals are held twice a week, the pupils attending in small groups to insure more individual attention.

Since the last report the schools have sung before the public but three times; at the Lincoln day lecture; at the Memorial day exercises of the grammar grades, and at the commencement of the high school.

The orchestra gave some selections at the Athletic club fair, and at the class day exercises, and furnished creditably all the instrumental music at the commencement held in the Shrine theatre.

Respectfully submitted,

CHAS. V. H. COAN,

Supervisor of Music.

## Report of the Supervisor of Drawing

To David B. Locke, Superintendent of Schools:

The report of the Supervisor of Drawing for the year 1913-14 is hereby presented.

A former art director of a Massachusetts town, in answer to the question 'Why do we study Art?' says:

"We study art that we may learn to see understandingly and feelingly, to find beauty and truth in the things which surround us, to be filled with enthusiasm for all hand work which requires skill, thus developing power to create something expressive of the thought and character of the individual nature."

So many people seem to think that art is taught in the public schools solely to develop the power to draw straight lines, for we often hear the remark, "When I was in school, I never could draw a straight line." The ability to draw straight lines is not the aim of art instruction. The acquaintance of the general public with the work accomplished, gained by a visit to the annual school exhibit or by visiting classes throughout the year, would disprove this idea.

It also seems to be the conviction of many that good results are wholly dependable upon genius. If that were true, art instruction could not legitimately be included in the public school curriculum for, to quote from one authority, not more than one child in a hundred has real talent. Art is for all, not for the talented child alone, and good results are dependent chiefly upon good teaching and in the primary grades are solely dependent upon the instruction given.

Our aim is to train the power to see, the power to express oneself and the power to appreciate the beautiful and lastly to discover talent. The same principles are followed year by year with as varied an application and method as possible. In the fall and spring nature furnishes most of the material and in the winter manufactured articles of beauty of line and color serve as models. The next step is to put into practice in pure and applied design, the knowledge gained. To make the work in design of practical value, an attempt is being made to correlate the design in grades six to nine with the work in sewing.

There are no new developments in the grade work. Two teachers' meetings are held monthly for teachers of grades one and two and of grades three and four and other meetings are held as occasion requires.

An advance has been made in the department of art instruction in the High School. The rear of the assembly hall is now used for both the mechanical and freehand classes. The number of drawing tables has been doubled and for use in the freehand classes a screen has been made, casts for charcoal work have been purchased and a set of new models for object drawing are soon to be placed in the class room. A cabinet, in harmony with the furnishings of the room, for the keeping of supplies is greatly needed.

Two new mechanical drawing classes composed of manual training boys are about beginning the instruction to correlate with the manual training.

The increase in size of the teacher training class and a better arrangement in the amount of time devoted to art have made the work more satisfactory than heretofore. A great hindrance to good results with these classes is a lack of foundation training.

Some have never had instruction in drawing before they enter the class and some who have completed three or four years of high school work have never elected the subject.

To repeat a statement in last year's report, all who have any idea of teaching ought, without fail, to elect drawing as a part of their high school course.

The number of pupils electing drawing in the High School this year has more than doubled that of the last few years and the total registration is larger than it has ever been.

The work of our public schools was displayed at the Dana School last June and efforts were made to secure the attendance of parents and friends, the interest shown being somewhat better than the year before. All who help to make the exhibit a success would be greatly encouraged and helped by a still larger attendance at our next annual exhibit.

Teachers and pupils show much interest and the cordial and friendly spirit in which all co-operate makes the work a great pleasure and cannot fail to secure good results. Sincere thanks are tendered to all who give and receive instruction and to all who assist in so many other ways.

Respectfully submitted,

MARION G. LEES.

Supervisor of Drawing.

February 2, 1914.

## Report of the Supervisor of Manual Training

To David B. Locke, Superintendent of Schools:

In presenting my second report as supervisor of manual training, I would like to divide it into two distinct parts:

1—"What We Are Doing."

2—"What We Would Like To Do."

Before dealing with the first topic, I would like to say just a word regarding industrial education.

We are finding as time rolls on that industrial education is rapidly pushing its way toward the front, and that our classical courses, however perfect they may be, are steadily decreasing in numbers.

Educators the world over are devoting a great deal of time in bringing this important branch of education to the front. Professor James states: "The most colossal improvement which recent years have seen in secondary education lies in the introduction of manual training schools, not because they will give us a people more handy and practical for domestic life and better skilled in trades, but because they will give us citizens with an entirely different intellectual fibre."

The foregoing in brief is what these courses in manual training are doing for the future citizens of this country.

"What We Are Doing."

The courses in manual training in this city commence with the seventh grade and continue through

the first year in the high school. Commencing with the simplest exercises possible the boy gradually becomes accustomed to the use of the different tools by a series of graded articles which bring into use a new tool or a different way of using an old tool.

The boy, as he continues, gradually finds himself attempting a number of cabinet-making problems, which are not only interesting, but become useful in the home or elsewhere.

The course being elective in the high school, we try to give the student in the ninth grade some simple blue print reading which is interspersed throughout with estimating the amount and cost of stock consumed in the construction of his different exercises.

The high school work, which is largely cabinet work, has interspersed throughout the course the mathematics involved and also lectures on the different woods, tools, etc., as well as a complete knowledge of simple blue print reading. The student also is of service to the school by being able to repair articles which become mutilated during the school year such as scraping and re-finishing desks, seats, etc., thereby saving the city the expense of new ones.

The efficiency of this department has been greatly increased by the installation of satisfactory machinery, thereby placing it in a position to undertake any problem that might arise in the mind of the student at work.

"What We Would Like To Do."

A short time ago we were fortunate in having with us Mr. Hunter, supervisor of the manual training department of Fitchburg, Mass., who addressed the teachers on the subject of "Part Time System." To my

mind, we have in this city excellent accommodations for starting a similar course, and conferring with a number of manual training students upon the subject, I find that there is considerable enthusiasm among them for the establishment in Rutland of such a course.

We are going to benefit the employer by giving him a more educated apprentice and eventually a better and more skilled mechanic than he could get in any other way. We are also going to double the capacity of the manual training department of our high school which may delay for a time an increased expense to the city by the addition of more space.

In explanation of the above we must understand that one-half of the students are at work in the shop while the other half are at work in school and visa versa, alternating each week.

The hearty co-operation of the parents, manufacturers and those interested in the Industrial Course will do much in establishing the "Part Time System" in this city.

Commencing with the next school year, the supervisor would like to have installed a sufficient number of lathes so that those wishing to continue their work in this line through a second year may do so.

In conclusion, I wish to express my sincere appreciation to the Board of School Commissioners of this city for the purchase of the necessary equipment needed for the further development of this department.

In the recent death of my co-worker, Warren R. Rice, the schools have suffered the loss of a faithful teacher and friend; in his department, one who was beloved by all and who untiringly performed the duties required of him. His hearty co-operation aided to a great degree in making the work most successful

and his untiring efforts along these lines will not soon be forgotten, especially by those whose privilege it was to be so closely associated with him.

Respectfully submitted,

HAROLD B. ADAMS,

Supervisor of Manual Training.

February 2nd, 1914.

## Report of the Supervisor of Domestic Science

To David B. Locke, Superintendent of Schools:

A report of the work of Domestic Science for the year 1913-1914 is herewith presented.

Naturally, with a change of teachers, the outline and methods of the Domestic Science course has been changed, especially in sewing. On account of the continual change of teachers every year or two, there should be a regular outline of the course in sewing which could be adapted to the method of the individual teacher, but which would be fixed firmly enough to allow the children a steady progress.

Sewing is taught in the last four years of the grammar school grades. In the sixth and seventh grades the object of the course is to teach the child to take class directions, to learn the technic of making stitches, to apply these stitches to articles of use, and to awake an interest in sewing.

This year the sixth grade has less than a half hour and the seventh grade three-quarters of an hour of sewing a week, owing to the very large attendance in the various schools. These periods are made possible by the kind assistance of Mrs. Cardelle of the Teacher Training Class. The children in the sixth grade learn the stitches first on canvas, then try them on cotton cloth, and when sufficient knowledge has been attained they are applied to some useful article. The work of the next year is to acquire more skill in sewing by mak-

ing articles for themselves and to learn how to darn, patch, mend, and make button-holes.

In other years the eighth grade has made dolls' clothing but now they are making a set of undergarments for themselves. The pieces are large and we are handicapped by lack of room, equipment, and time, but by doing outside work the girls have managed very well.

This year the ninth grade is not doing the work which next year's class will do. The work will begin by making a simple apron for machine practice, continue with making the cooking outfit, and the rest of the year will be devoted to dressmaking. This year dressmaking will be omitted because of inexperience in handling large pieces of cloth, and for lack of time.

Cookery is studied during the first two years of the high school course. The number of girls electing cookery has increased continually so that the Domestic Science teacher must give two entire days a week to the High School. It is to be regretted that this course is elective and that the credit and time given to it are not equivalent to the benefit which should be derived. However, it is hoped that a four year course will be started next September, because sewing and cookery are only a part of the study of home-making; the questions of home organization, management, care, repair, sanitation, and decoration are also important and should have their place in Domestic Science in every High School. These subjects must, however, be preceded by some knowledge of physics, chemistry, and physiology; and should be surrounded by academic work in English, Languages, History, and Mathematics.

In the first year the classes are instructed in the complete care of the kitchen, the study of and ways of

cooking the various foods; fruits, vegetables, starches, cereals, sugars, milk, butter, cheese, eggs, meat, fish, gelatine, salads, and frozen desserts. The class is also taught the elementary rules for table-setting, for planning, preparing, and serving simple meals.

The work in the sophomore year begins with preserving foods, a few lessons on reviewing principles learned in the previous year, and is followed by a complete series of lessons on batters and doughs, pastry, salads, frozen desserts. The subject of nutrition and diet is extended covering the ground of composition of body and food, classification and uses of foods, digestion, nutritive and fuel value, and digestibility of foods, planning of cooking and serving a well-balanced meal.

In closing I wish to thank the teachers and parents for their kindly interest and willing co-operation, and to extend to them the assurance of a hearty welcome if they care to visit any of the classes in Domestic Science. I also wish to thank Mrs. Cardelle of the Teacher Training Class, who has responded so enthusiastically to my appeal for assistance, thereby making my elementary work possible by taking five of my classes.

Respectfully submitted,

FLORENCE GOLDSMITH,

Supervisor of Domestic Science and Art.

February, 1914.

## Report of the Principal of Teacher Training Class

To Mr. D. B. Locke, Superintendent of Schools:

I hereby submit my report for the Teacher Training Class of the Rutland high school.

The enrollment this year has exceeded that of any year since the course has been in existence. One interesting feature of the work is that the training is attracting more and more those who have been out in the field and who realize their incompetence to deal with the rural problem successfully without preparation.

A satisfactory degree of efficiency in handling the younger children and in meeting difficulties wisely has already been attained, and it is desirable that the remaining half year be as profitably spent in work with older children.

Considerable substituting has been done by the members of the class. I believe all of the substituting in grades up to the seventh and, in some instances, in the grammar grades, has been done by members of the class. The greater part of this work I have supervised, but on account of conditions that usually obtain in substituting, the impossibility of being carefully prepared for the assignment in the majority of cases, I consider it the least valuable of the training work.

The pedagogical library for use in this course has been increased by twelve volumes this year so that we have a valuable working library of thirty-eight volumes besides useful texts that are the gifts of publishers.

The report of the recommendations of the Carnegie Foundation for the Advancement of Teaching is not completely before us as yet. There is enough, however, to lead us to believe that in the fuller report the course is worked out with a degree of detail that, if followed, ought to lead to its greater effectiveness. From the outset I have recommended that candidates for this course be equipped with a knowledge of specific high school branches, viz., chemistry, sewing, cooking, zoology and agriculture, so that the work of the one year's training could be more intensively given over to principles, methods and management. This means that a prospective teacher would need to be a candidate for this course earlier in her high school career than the senior year or the year after graduating.

I wish to emphasize, too, the need of general scholarship as a *sine qua non* qualification for this course. The whole scheme is founded upon the hypothesis that with three or four years of high school work the student is fitted to begin vocational studies. This work is somewhat delayed and, consequently, lessened in its extent if a pupil enters without a knowledge, for example, of paragraph structure or ability to analyze simple problems.

The practice school has taken on another grade and now includes the first three primary grades, with an enrollment for last term of ninety-one.

Respectfully submitted,

MARGARET M. HEALEY,

Supervisor of Teacher Training Course.

February, 1914.

## Report of the Truant Officer

To D. B. Locke, Superintendent of Schools:

I beg leave to submit herewith my report as truant officer for the year ending December 31, 1913.

In my department, there were the usual efforts put forward for securing accurate data as to home discipline in the matter of school attendance.

I have to offer the following:

Number of cases reported .....	1223
Number of cases personally investigated .....	1082
Cases of legal and reasonable excuses .....	1165
Number of truancy cases .....	58
Sent to Industrial school .....	1

The phrase, 'Legal and reasonable excuses,' used above is intended to cover the cases of epidemics of colds, scarlet fever, chickenpox and other juvenile ailments. It must be noted that the cases of scarlet fever, chickenpox and other minor indispositions ought to be considered and taken into account as to attendance where ten days have consecutively elapsed from the first day of absence. It should also be remembered that school attendance materially decreases by reason of fear of epidemics. This situation is one which can only be handled by expert medical attention and rigid hygienic supervision.

Attendance has been lower for the past year over the preceding five years in percentage. There have been certain cases reported (but not investigated by myself) by the health officer to the superintendent of

schools; these have been duly sent to me.

Truancy cases have been generally confined to children of tender years. In most cases the truants have not arrived at an age where a knowledge of the offense could justly be attributed to them.

During the past year I have expended \$140 for clothing for indigent school pupils. On request, I made and secured a requisition upon the Overseer of the Poor for the sum of \$5 for needed wear. In all probability, it will have occurred to you and the other local educational authorities that our school facilities are being severely taxed by the influx of indigent pupils from out of town.

It ought to be noted that the decrease in school attendance hereinbefore mentioned should be considered with reference to the various epidemics spoken of. A school 'scare' is much like a theater panic. Everything depends upon the exercise of the common sense of parents and teachers; there should be no hostility in this regard.

I take this opportunity of expressing my thanks for the cordial co-operation of the members of the teaching faculty and the well-wishers for our schools.

Respectfully submitted,

J. J. HICKEY.

Truant Officer.

January 31, 1914.

## Auditor's Report

To the Honorable Council of the City of Rutland, Vt.:

The Auditors for this City respectfully make their annual report for the year 1913—that they have thoroughly examined, audited and verified the books of the City Treasurer, the City Clerk, the Overseer of the Poor, the Superintendent of the City Schools and the Sinking Fund Commissioners.

The Auditors also have examined the books of the City Constable and Collector as far as possible and have checked from his books the amount of money paid by him to the Treasurer and abatement of taxes made by the Board for the Abatement of Taxes.

They have found that the account books in all of these departments of the City's affairs have been kept in a neat, accurate and businesslike manner, that all money received by the City's officers in these departments seems to have been entered in the proper way and under the proper accounts and duly accounted for in all respects, and all money paid out has been expended against duly authorized and authenticated vouchers on file in the respective departments, and that the Cash Balance in the hands of the City Treasurer at the end of the year 1913, was exactly the amount which should be in his possession according to the account books kept by him.

They congratulate the City on the faithful services rendered to the City by its officers as named above, their work will compare most favorably with similar work done in other cities of New England and elsewhere.

As far as the Auditors have been able to ascertain, there were no bills outstanding against the city at the end of the year 1913 on account of the School Department.

The outstanding 1913 accounts, unpaid at the end of the year 1913 against the city amounted to about \$2,300, made up in part by the amount due for a stone crusher, about \$1,800 and by about \$500 due for asphalt work on sidewalks.

The City Treasurer has made of his own volition, assisted by the proper officers, an appraisal, in part, of the City's water system, public buildings, permanent and other machinery tools and supplies on hand, and the auditors refer to his report for the items of such an appraisal.

The City Auditors again call urgent attention to the fact that the City Treasurer carries on his books as an asset of the City an accumulation of old and partly outlawed accounts receivable, some dating back to the organization of the City amounting approximately to \$3,000. These accounts are not of any value whatever, many of the parties against whom these accounts run being dead and their estate settled. The Auditors again submit that the Treasurer be relieved of these accounts by having them abated by resolution of the City Council in proper form.

The Auditors further request in the interest of the City's welfare that all City Officers, without any exception, who come into possession of funds belonging to the City be required by an order of the City Council to that effect, to turn such funds, at once and without any delay whatsoever, over to the City Treasurer. Under the practice now prevailing some of the City Officers keep such money received by them in

their official capacity in their possession an unlimited length of time—paying it over to the City Treasurer when they choose and see fit to do so. This entails a loss of money to the City as the City receives interest from the banks where its deposits are kept—and the practice of some of the City's officers as explained above ought to be stopped at once and not permitted to continue any longer.

Respectfully submitted,

C. TURNER,  
JAKE HEYMAN,  
GEO. C. COBB,

City Auditors.
